Fantrax Fantasy ADP Shortcode
By Tyler Steinhaus
August 8th, 2017

The plugin **Fantrax Fantasy ADP** uses a shortcode to pull in the required feed that displays in tables on the front end of the website.

The shortcode is setup to use special parameters that you use so you can setup feeds throughout the website as needed.

Shortcode:
[fantrax_table]

Parameters:
- sport
    - NFL, NBA, NHL, MLB (Uses the abbreviation have setup in the api). Default is NFL
- position
    - Use the position abbreviation that is setup. Default shows all positions
- start
    - start allows you to customize when the feed should start, so say if you want to show the feed starting at 100 instead of 1, enter in 100. Default is 0
- limit
    - How many players would you like to show? Default is 100
- order
    - ADP, ADP_PPR, NAME. Default is ADP

Examples:

Top 100 NFL Players:
[fantrax_table]

Top 50 NFL Players:
[fantrax_table limit="50"]

Top 75 MLB Players:
[fantrax_table sport="MLB" limit="75"]

Top 50 MLB Shortstops:
[fantrax_table sport="MLB" limit="50" position="SS"]

Display the top players that are position 100-200 for the MLB:
[fantrax_table sport="MLB" start="100" limit="100"]
